

The last thing in life that the Pisces will want is any sort of stigma being attached to him. Society being the way that it is about homosexuality, the Pisces would just as soon skirt the issue of any same-sex feelings he might have, often refusing to have them any evidence.

So quickly will he rip any inkling in the bud that it will often be unclear, even to the Pisces himself, which way the wind will end up blowing for him.

The gay Pisces, but for the aforementioned enclave, is generally a pretty hardy, masculine character, like his straight counterpart, but fully focused on his career, also a decidedly creative one, making little of his sexual proclivities. For starters, he doesn't mind much with other men, the bulk of his friendships being with single, somewhat fag-taygish women whom he takes under his wing to instruct about the finer things in life.

Pisces, of any sexual orientation, isn't ever caught up in materialism even when he embarks on money-making ventures. Rather, he seeks to buy freedom and the opportunity to color his world with the imaginative brush he brandishes. In his soul, he's a bohemian, and the gay Pisceans in particular will inhabit a world of fringe or forgotten artists, filmmakers, designers, and other innovators (typically like himself) who exhibit a certain evolutionary cultural vision. It's this which he hopes will rub off on his female friends, for whom he often plays the surrogate husband. In such relationships we see that Jacobs-Magdalene connection almost ridiculously clear. Being that

Virgo woman, specifically, falls under the magdalene archetype, the world is populated with pinupps of spinsterish Virgo girls and the gay Pisces guys who love them.

A societal orphan, he often seeks, in a sense, to be adopted by his straight male cronies for whom he'll also prep over and cook a meal, decorate a room, or fix the plumbing in return for their affection. Pisces doesn't have many gay male friends. Like his straight brothers, he is rather uninterested and cynically prejudiced towards emasculated people. Meanwhile, he is incredibly secretive as to the types of activities he does get up to, when venturing forward to get his jollies out. He isn't much into bars as a means of meeting men, being happy to have a few cocktails but bored with the ritual of cruising and chit-chat: he'd prefer to get more directly to the point. As gay life provides more of the kind of dark, vague, dreamlike environment that Pisces men of any persuasion appreciates, the gay fish finds no lack of venues to provide him anonymous, manlike erotic involvements. He never throws himself into the mosh pit of some orgiastic scene; rather, he floats around the periphery of such settings waiting to focus his typically **erotically fixated penchants** on other such boners as strike his fancy.

Even in such an environment, however, the Pisces is extremely picky, drawn to overtly masculine men whom he might even assume lead straight lifestyles back on the other side of the veil. This is, in fact, Pisces' biggest turn-on. Ironically, he is cynically prejudiced toward men who call themselves bisexual - his other notorious allergy is towards gay girls.

However, if he comes across a fellow who is fiercely attached to labeling himself straight, except for what he might get up to with the Piscean guy alone, this is sexual nirvana for the fish. That fine line between straight and gay provides endless fascination for him stemming from his youth, wherein his first experience is often with a macho, closeted so-called heterosexual. As he matures, he gravitates towards such types, who tend to be of certain ethnic extractions, particularly Southern European or North

Africans, where grey/straight boundaries are more readily blurred.
Short of moving to a greek fishing village, the infamously little
and pretty pisces does his best to hand a type of man with
whom much is left unsaid and the banal realities of their
lives are checked at the bathroom door. This special someone,
even though remaining a love for many years, might just
come and go, forming a bond with the Pisces that is thus
comprised of a series of dreamy, vague interludes, which such our
fine fish follow just fine.
